1. All plumbing needs to be installed, sealed, and assured by a licensed plumber. SkinAct/Spa and Equipment is not responsible for liabilities regarding plumbing, sealing, or maintenance of such equipment.

2. If the shampoo bowl is not aligned with the base, drilling or expansion of the fiberglass may be required.

Highlights

Features:

- Porcelain stationary bowl
- Faucet
- Soft spray hose
- Silicone neck rest
- Drain assembly w/ strainer
- Arched backrest for extra comfort
- Chrome arm rests

*** Optional Vacuum Breaker ***

Detailed Unit Dimensions:

- Length from back to front: 55”
- Width of the seat: 20.5”
- Width of the seat with arm rests: 26.5”
- Height from the ground to the top of the bowl: 32”
- Height from the ground to the top of the seat: 21.5”
- Foot rest dimensions:17”L x 15”W x 9.5”H
- Bowl interior: L = 22.5” / W = 18”

All shampoo chairs, shampoo bowls, pedicure chairs and equipment that have plumbing need to be installed, sealed, and assured by a licensed plumber. SkinAct/Spa and Equipment is not responsible for liabilities regarding plumbing, sealing, or maintenance of such equipment.

Installation Requirements

All plumbing-related equipment must be installed by a **licensed plumber**, with **documentation of installation** provided to info@skinact.com within **30 days of delivery**.
Plumbing connections must include **shut-off valves**, **leak detectors**, and **drain pans** as required by local code.
Shampoo units and chairs must be **bolted or secured to the floor** to prevent shifting or stress on plumbing lines. Mobile use of plumbed equipment is **strictly prohibited**

Shampoo Chair Anchoring & Plumbing Liability

- **Shampoo chairs must be anchored to the floor** to prevent plumbing line stress or failure.
- Do not relocate once plumbed. Movement may cause leaks and void the warranty.

Lifespan Expectations & Maintenance (Professional Use)

Component	Expected Lifespan	Required Maintenance
Flexible Water Hoses	1–2 years (replace annually in high-use)	Inspect quarterly, replace as needed
Drain Fittings & Traps	1–3 years	Clean monthly to prevent clogs
Spray Nozzles	1–2 years	Clean weekly to prevent mineral buildup
Electric Actuators	3–5 years	Keep dust-free, avoid overuse
Ceramic/Porcelain Bowls	5–7 years	Avoid harsh chemicals, inspect yearly

Replacing high-wear parts at regular intervals is required to maintain warranty eligibility. Failure to maintain/replace parts voids coverage.
The customer is solely responsible for verifying that the installation site is **water-resistant**, properly drained, and compliant with **local plumbing codes**.
Any alterations to plumbing lines, hoses, or valves voids all warranties.
Hoses, fittings, and water-contact parts are considered **wearable components** and should be **inspected monthly** and **replaced as needed**, at least **once per year** for professional use.
Failure to install equipment as instructed or maintain it regularly may result in **voiding the warranty** and rejection of damage claims.

SpaAndEquipment.com does not cover:

- Secondary or consequential damage (e.g., business interruption, replacement of floor coverings, mold remediation, or loss of use)
- Damage resulting from **storing equipment in humid or unventilated areas**, or **before installation without our written storage approval**
- Any water-related claim where proper installation documentation was not submitted as required
- Costs associated with inspection, labor, or third-party evaluations unless authorized in writing by SpaAndEquipment.com

Maintenance Requirements & Recordkeeping

To ensure the longevity, safety, and performance of your equipment, and to maintain eligibility for warranty coverage, regular maintenance and documentation are required. Failure to maintain the product properly or provide documentation upon request may result in warranty denial.

Required Maintenance Includes:

Monthly inspections of hoses, fittings, seals, and plumbing connections for signs of wear, corrosion, leaks, or stress.
Annual replacement of all flexible plumbing hoses and connectors used in high-traffic or commercial environments.
Routine cleaning of filters, jets, and water channels to prevent buildup and clogging.
Electrical system inspections (if applicable) to ensure safe operation and code compliance.
Regular draining and flushing of any built-in tanks or water lines, as applicable.
Shampoo units and treatment chairs must be checked to confirm secure floor anchoring and no movement that could affect plumbing integrity.

Maintenance Log Requirements:

Customers are required to maintain a Maintenance Log, which must include:

- Date of each inspection or service
- Type of service performed
- Name and contact info of the technician or staff member who performed the service
- Any parts replaced (e.g., hoses, seals)
- Photos of work or wear-and-tear (must be emailed to us within 30 days)

This log must be:

Kept on file for the full duration of the warranty
Available upon request by SpaAndEquipment.com or SkinAct in the event of a warranty claim, damage report, or inspection

Submission Requirements:

Proof of initial installation by a licensed plumber and/or electrician must be submitted to info@skinact.com within 30 days of product installation. Additional maintenance records may be submitted annually or upon request to maintain active warranty status.
