D250	

CAUTIONS

- Do not leave the handle on the same part of skin for too long since it can cause injuries.
- Avoid using it on irritated skin.
- The following skin areas are unsuitable for these treatments: skin tumors, moles, birthmarks, angiomas, lips, eyes, herpes and warts.
- Do not work the vacuum pump for extended periods without cool-down time between treatments in order to prevent overheating of the pump and damage to the machine. Damage caused by overheating of the pump is not covered by the manufacturer's warranty.

FAQ

- If the suction effect is reduced:
    - Replace the metal and foam filters.

MAINTENANCE

- The foam filter in the handle needs to be changed after every 5 treatments. Dismantle the handle and replace the filter. Then reassemble the handle.
- The metal filter in the handle needs to be changed after every 5 treatments. Dismantle the handle and replace the filter. Then reassemble the handle.

- Clean and sterilize the diamond heads after every treatment.
