Spa & Equipment SKIN+ACT

Tools

Diamond Microdermabrasion: Diamond microdermabrasion resurfaces the skin non-surgically by using sterile diamond heads to peel and rub off the dead cells of the top skin layer. The microdermabrasion handles are attached to a vacuum. So, the dead skin cells are sucked away.

Ultrasonic: Stimulates the skin tissue with acoustic vibrations. Improves cell membrane and regenerates collagen. Reduces wrinkles and fine lines for younger looking and feeling skin. Ultrasonic also generates frictional heat which accelerates blood circulation and helps muscles to relax. Decomposes cellulite and allows deeper product penetration into the skin.

Cold/Hot Hammer: The Cold/Hot Hammer cools and soothes the skin with the cold side and warms the skin on the other side. Cooling the skin is important after a microdermabrasion treatment. Warming the skin opens pores and helps products to penetrate more deeply.

Highlights

This revolutionary equipment features a diamond microdermabrasion, ultrasonic, and cold/hot hammer treatment capabilities all in one convenient device. With its versatile design, this powerful piece of equipment offers multiple services in one machine. For professional aestheticians or beauty centers looking for an efficient and cost effective device that offers multiple services, the Diamond Microdermabrasion With Ultrasonic and Cold/Hot Hammer is the ideal choice as it does it all!

Features:

- **Diamond Microdermabrasion:** Steam intensity, timer and ozone option.
- **The Hot and Cold Hammer Treatment:** Adjustable arm, bright cool-tone LED, and magnifying lens.
- **Ultrasonic:** 5 professional glass electrodes, high frequency handle, intensity level adjustment.

Specifications:

Diamond Microdermabrasion

Diamond Microdermabrasion has 3 tip grades

3 Large: Fine, Medium, Coarse

3 Medium: Fine, Medium, Coarse

3 Small: Fine, Medium, Coarse

The optional Diamond Microdermabrasion comes with 9 Tips and 3 Handles with filters
