Equipment Features

This series are composed of metal shell , stainless steel base, fashionable glass water cup, copper spray pipe and so forth. Therefore, it is featured with solid structure, durability and good shape. The special stainless steel base guarantees the stability and safety in high temperature, and it will not result in oxidation or re-composition in high temperature, so as to avoid some oxidized and heavy metal atoms from some traditional material in high temperature when they are at work, to harm the skin. Hence, it can guarantee the requirement for cleanness of vapor in beauty treatment.

The spray head can rotate at various angles, which make the operation more easily.
Apart from the basic herbs function, it is also equipped with time pre-set, five levels spray adjustment, and an automatic water level detection.
Besides, it also equipped with maximum and minimum water level alarming system, so as to prevent the damage for heater parts when the water level is too low, or prevent the users from opening the steamer due to their carelessness when there is no water in the water cup.

Warning

- Please make sure the power line is cut off when there is no water or a lack of water. To avoid any danger, disconnect the power when the water level is low. Otherwise, the users should take full responsibility if there is any accident.
- Please read the detailed instructions carefully or operate the instrument with the help of professional technicians.
- Children shall not use this instrument and get close to or play this instrument within an hour after the instrument stop operating.
- Since this instrument works with high temperature, keep an eye on the instrument when it is working to prevent any accidents or fire.
- Do not use any greasy elements into the water container or the herbs filter mesh, otherwise, water may spray out.
- Do not spray vapor directly down to the client's face two closely, or it will cause scald.
- Do not use the steamer under humid environment, like bathroom, etc.
- Do not use the steamer under the sun for long time, otherwise, it will cause some instabilities.
- Do not conduct electricity between probes directly, or it will lead to elements damages.
- Do not open up the machine by oneself. If there is anything unusual, please consult the sales agent.
